The long-lasting, beautiful, and noble flower in full bloom.

Also known as "the king of flowers" and "the noble and elegant flower", the Botan (peony) has been the subject of people's love and fascination since ancient times. You can enjoy its beauty only for quite a short time as it blooms just for 3-4 days. The preserved flower of peony was created out of our desire to let people enjoy its beauty for as long a time as possible.

Each and every flower is handcrafted with thoroughly-selected material and commitment to quality.

We are using peonies cultivated in YUUSHIEN, a flower garden in Matsue famous to the world for its superb-quality peony. We harvest peonies at their peak of beauty and freshness and then carefully handcraft them into preserved flowers.

\*Preserved flowers are made from natural flowers through a special treatment process so that their beauty and fresh texture last for long time while their original shape is kept.
